Coordination Message

This Code of Ethics, built with the contribution of everyone working at CAPSUS, is a reflection of our shared commitment to grow as individuals and professionals. Inspired by our Vision, Mission, and the 5Cs that bring our culture to life (Co-responsibility, Commitment, Growth [Crecimiento], Creativity, and Credibility), this code guides us toward excellence, sustainability, and a prosperous and inclusive future.

Here you will find the principles that govern our actions, from respect for diversity and environmental protection to transparency in managing conflicts of interest and the prevention of corruption. As a team, we build a stronger, more ethical, and more human CAPSUS.

1 Objective

To establish the fundamental principles that guide our individual and collective behavior, reflecting our commitment to transparency, intersectionality, and respect in all our interactions with external collaborators and diverse suppliers.

2 Scope

Our Code of Ethics applies to all internal and external collaborators acting on behalf of CAPSUS. Unforeseen situations or additional topics that arise in practice will be integrated as necessary. This code follows our basic principles shaped by our Vision, Mission, and the CAPSUS 5Cs, which form our work culture.

3 Organizational Philosophy

Vision

To be the premier global reference in sustainable development consulting services.

Mission

CAPSUS promotes sustainable development through the understanding of cities, driving inclusive and in-

formed climate policies, actions, and plans. Through the implementation of proven methodologies and the development of new analytical methods and tools, we foster economic growth, environmental protection, and equitable well-being to build a prosperous, inclusive, and resilient future.

Our Values

- **Co-responsibility:**
 - *Global:* We share the responsibility of making our country and planet a better place. Specifically, we seek to improve the environment, quality, and standard of living.
 - *Personal:* We understand that we are all responsible for our own actions, both at the corporate and personal levels.
- **Commitment:** We share the commitment to give our best (energy, time, attitude, respect) to our team, our clients, and ourselves.
- **Growth:** We know that the best way to grow and add value is through study, preparation, experience, and feedback, always considering a horizontal structure among team members. We believe the growth cycle should be: Preparation - Experience - Learning - Growth.
- **Creativity:** Our clients have many options to implement traditional solutions to their problems; our value lies in thinking outside the box, integrating diverse disciplines to create new solutions that are useful and applicable to our partners and clients.
- **Credibility:** Our existence and work are based on the credibility we build for each and every one of us and for the company. Therefore, our recommendations are free from biases and are supported by proven technical foundations. All our proposals, actions, and solutions incorporate our values, the state of the art, information technologies, and best practices in the field we work in.

CAPSUS Decalogue

It guides our work toward excellence and responsibility. It drives us to deliver high-quality products, promote sustainability in every action, continuously innovate, and foster the professional growth of our team. It reminds us of the importance of knowing our audience, communicating assertively, being rigorous in information review, and validating our findings with diverse sources. Essentially, it promotes constant learning and trust within the team to achieve our objectives with integrity.

Respect

We respect human rights as a fundamental principle, ensuring that all actions and decisions align with the dignity and rights of those collaborating at CAPSUS. We promote a work environment where consideration and tolerance prevail, including respect for the opinions, beliefs, and diversity of those collaborating internally and externally. We foster an inclusive teleworking environment free from discrimination. We establish the importance of open and respectful communication, where the ideas and contributions of all team members are valued.

Integrity and Honesty

The integrity and honesty of all team members are fundamental to the success and trust in CAPSUS. Each team member must promote transparency in all their actions and decisions, which helps build an environment of mutual trust and respect, acting ethically and honestly, even when no one is watching.

4 Environment

Sustainable development is one of CAPSUS' central pillars. In our organization, we consider the appropriate use of natural, human, and economic resources to be a shared responsibility. We are committed to promoting and disseminating sustainable development among our teams, allied organizations, and clients.

5 Social Responsibility

It is a genuine commitment to the well-being of people and the planet. It involves acting with integrity, transparency, and respect in all our operations, seeking to generate a positive impact on society and the environment. This is materialized in the promotion of diversity and inclusion, the pursuit of sustainability in our projects, and contributing to a fairer and more equitable future for all people.

6 Regulations

Internal Regulations

Those of us collaborating at CAPSUS must know and comply with internal policies, regulations, rules, and provisions. In this way, we strengthen our organizational culture and promote an environment of responsibility where each person is committed to reporting any non-compliance.

Conflict of Interest

Transparency and integrity are key to preventing conflicts of interest. We recognize that these situations can interfere with our professional responsibilities. Therefore, we promote a culture of openness and communication, where every collaborator commits to identifying, reporting, and responsibly managing any potential conflict of interest, acting with impartiality and always prioritizing CAPSUS' values. As part of this commitment, accepting gifts of any kind from people outside the team is prohibited, in order to preserve our impartiality and objectivity in all our actions.

Personal Interests

Personal interests can influence decision-making and compromise professional impartiality and objectivity. At CAPSUS, it is essential that all collaborators act transparently and honestly, ensuring that their personal interests do not conflict with the organization's goals and values.

Prevention of Bribery and Corruption

We act with honesty and transparency at all times. We reject any form of corruption, such as bribery, extortion, human trafficking, or influence peddling. We are committed to conducting our activities with integrity, following the principles of our internal anti-corruption policy. We promote a whistleblowing culture, where every collaborator has the commitment to report any suspicious act of corruption, thus contributing to maintaining an ethical and transparent work environment.

7 Work Environment

We offer a respectful, safe, and inclusive work environment for all people, where inclusive language, gender equity and equality, and labor inclusion are promoted, including vulnerable groups and minorities. We reject any form of harassment, whether sexual or workplace-related, and foster an environment that respects the gender identity and expression, as well as the sexual orientation, of each individual. Likewise, we work to implement intercultural and diverse supplier policies. We have reporting channels and an action plan to address any case of discrimination or abuse, vigorously committing to preventing practices such as child labor and human trafficking.

Diversity and Inclusion

We value human development as a fundamental part of our work. We believe in creating a sustainable world and a more equitable and just society, and this can

only be achieved through the promotion of diversity and inclusion in all our practices. We promote a work environment where every person, regardless of gender, sexual orientation, ethnic origin, religion, age, disability, or any other condition, feels valued, respected, and has equal opportunities to fully develop. We reject any form of discrimination and strive to create a space where diversity enriches our work and allows us to reach our maximum potential as a team. CAPSUS has a Gender, Diversity, and Inclusion Policy that establishes the company's commitments to comply with these precepts.

Health and Safety

We prioritize the health and safety of our team, promoting a safe and healthy work environment. We foster a culture of prevention, in which we comply with regulations and actively participate in the identification and mitigation of risks. This includes regular psycho-emotional and medical evaluations. We recognize that needs vary according to the specific situation and condition of each member.

8 Care and Protection of Resources

Information

We establish a firm commitment to information protection. We recognize the importance of safeguarding financial data, intellectual property, the personal information of collaborators and clients, as well as computer systems. We ensure the confidentiality, integrity, and availability of this information through robust security measures and responsible practices that prevent unauthorized access, misuse, or inappropriate disclosure.

Protection of Tangible Assets

The collaborator commits to safeguarding the tangible assets provided to them to carry out their daily activities.

Confidentiality

We protect the confidential information we have access to, ensuring it is not disclosed without proper authorization. Collaborators are obliged to scrupulously guard confidential information, technical, industrial, commercial, administrative, operational, and promotional secrets they become aware of due to their daily activities, without causing harm. We protect the information of all collaborators, which may not be shared without explicit consent, unless there is a legal obligation, and always with prior notification.

9 Reporting Systems

Secure and confidential channels are established to report any behavior that does not align with CAPSUS' culture and philosophy, which are:

- **For the internal collaborator:** Open Inbox (Buzón Abierto)
- **For the external collaborator:** email: ideas@capsus.mx

Our actions are governed by a solid framework of policies that seek to ensure an ethical, fair, and sustainable work environment. To achieve this, we have a set of clear policies that guide our actions. These include rules of coexistence for effective teamwork, promo-

tion of equality and fair treatment for all, regulation of teleworking, care for the physical and mental health of our collaborators, commitment to the environment, and transparent practices that combat corruption.

The aforementioned is supported by our various policies:

- Internal Regulations
- Gender, Diversity, and Inclusion Policy
- Telecommuting Policies
- Health Policy
- Sustainability Policy
- Anti-corruption Policy
- Diverse Supplier and Consulting Policy
